Title: STEAM2017 Events Explore Integration Of Art & Science

Publication Date: January 31, 2017

Summary: STEAM2017 is a five-week program of exhibitions, lectures, workshops and talks with artists and scientists at the University of West Florida that explores how art can be added to the disciplines of science, technology, engineering and math to explore issues related to water and the preservation of a clean environment.

Among the presenters is Jiayi Young, professor of design at the University of California, Davis.

“I believe artistic and scientific collaborative endeavors can catalyze, accelerate and materialize idea translation to collaboratively solve pressing problems the world is faced with,” Young said.

Young and her husband, Shih-Wen Young who is a professor of astronomy and physics at **American River College** in Sacramento, Calif., will be exhibiting an installation called “Dance of a Tiger.”
